### PROJECTS

**Personal Portfolio Website** - Developed a responsive personal portfolio website using HTML, CSS, and JavaScript with a clean, professional layout. Highlighted resume, skills, and projects through structured sections including About Me, Education, Experience, and Contact.

**Book Management System** - Designed and implemented a full-stack book management website using React for the frontend and Node.js for the backend. Integrated user login to view books added by admins, with role-based authentication and authorization. Developed an admin dashboard supporting CRUD operations (add, update, delete) for managing book records.

**CRUD App** - Created a single-page application with full CRUD functionality using React state and props. Integrated localStorage for data persistence and built a responsive UI for managing tasks or items dynamically.
